

Dashboard censo de salud fuerzas armadas

Walter Andrés Garcia, Andrés Antonio Rico

Objetivo

Generar un sistema interactivo que permita manipular y manejar la información del censo de salud de las fuerza armadas

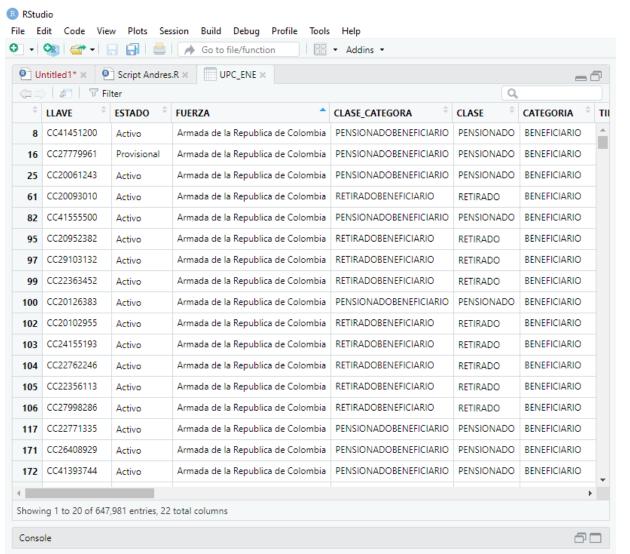

Alcance

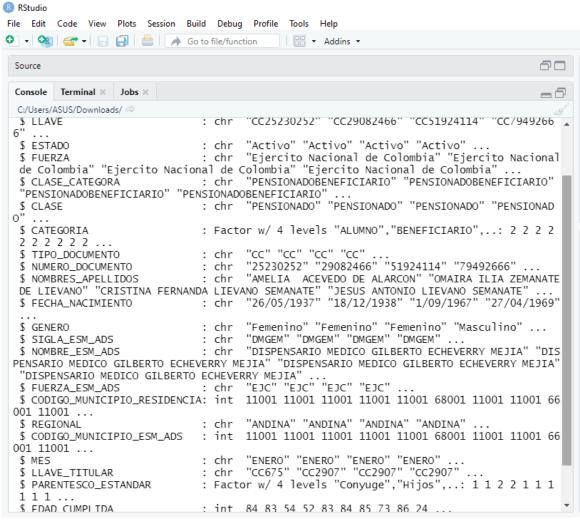

- Obtener un sistema interactivo que permita determinar cambios en el numero de usuarios.
- Obtener un sistema de visualización para nuevos usuarios.
- Mejora en la presentación de la información

Base de datos

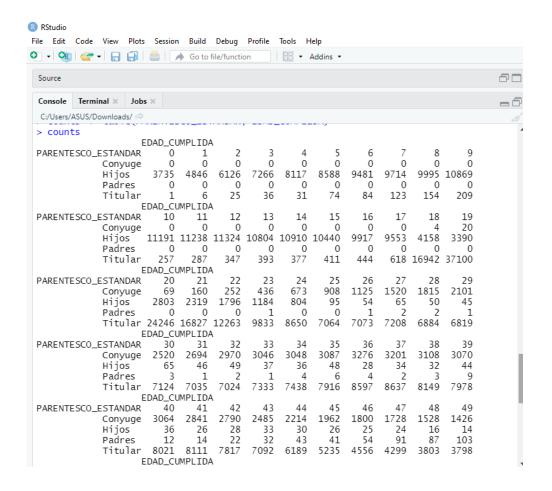

Implementación

iNEXT Online (Aug. 2022) Interpolation/Extrapolation Asymptotic Analysis Interpolation/Extrapolation (iNEXT) Data Summary Rarefaction and Extrapolation Figure Plots User Guide Introduction (1) Sample-size-based rarefaction and extrapolation sampling curve Data Setting 40 Choose one: Species diversity Demo data Upload data O Key in data Select data type: abundance data O incidence frequency data incidence raw data Choose demo data: 100 200 300 Spiders Number of individuals Beetles Rarefaction - - · Extrapolation Select dataset(s): Girdled Girdled Logged ♣ Save as PNG File

Aspectos adicionales

- Mapa
- Valores de asociación entre variables usando test de Cramer-V
- Análisis de correspondencia múltiple

Nominal Measures: Cramer's V (V)

- Cramer's V is used for tables <u>larger than 2x2</u>.
- Formula for Cramer's V:

$$V = \sqrt{\frac{\chi^2}{(N)(\min r - 1, c - 1)}}$$

Where (min r-1, c-1) is the minimum value of either the # rows-1 or the # columns-1.

Muchas gracias
